Allowable Subject Matter

1. Claims 1-40 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of the record fails to show or fairly suggest a method for processing image information, the method comprising transforming the image into a second color space, including interpolating the primary channel of said second color space to full resolution by interpolating missing Green pixels from said RGB mosaic, and computing the secondary channels of said second color space as differences from the primary channel of said second color space without interpolation of the missing Red and Blue pixels from the RGB mosaic, including performing substeps of (i) computing one of said secondary channels of said second color space by differencing Red pixels with co-sited Green pixels interpolated from said RGB mosaic, and (ii) computing the other of said secondary channels of said second color space by differencing Blue pixels with co-sited Green pixels interpolated from said RGB mosaic.

Claims 2-25 are allowable for the reason given respect to claim 1.

Regarding claim 26, the prior art of the record fails to show or fairly suggest a method for transforming RGB image information into an efficient color space representation, the method comprising transforming the image into a second color space having primary and secondary channels, the primary channel of said second color space comprising Green (G), including interpolating missing Green pixels from said RGB mosaic for purposes of computing the
